Floyd County Public Schools Budget Factors

The Schools Our Children Deserve

We all want our children to attend schools that are well-resourced and able to provide reliable transportation, nutritious meals, quality instruction, and essential health services. Since the pandemic, our roughly 2,000 students in Floyd face more challenges than ever, from staff shortages, drops in academic achievement, and additional mental health needs. When looking at our current local spending, it's clear our budget comes up short in meeting the most pressing challenges our students and schools face today. Floyd can step up to fund our schools at levels that meet our students' needs and better reflect our capacity and commitment to our children.

Budget

In the 2022-2023 school year, Floyd County spent \$15,039 per student, ranking us 52 out of 131 school divisions in the state.

Floyd has seen an increase in local per student spending of \$1,305 or 33% between the 2014-2015 and 2022-2023 school years (adjusted for inflation). Compared to the regional average for local per student spending, Floyd only spent \$171 more in the 2022-2023 school year. While Floyd had a strengthening economy over this time, its level of commitment and effort towards schools did not reflect this.

Outcomes

Many students lost significant ground on state academic achievement between the 2018-2019 and 2022-2023 school years. Students in Floyd saw a drop in pass rates on the reading SOL test of 9.1% and 30.9% in math - among the largest declines in the state. Yet further disparities exist, with math SOL pass rates dropping 53.3% for English Learners and 43.4% for economically disadvantaged students. Floyd must do more for its students who face significant barriers to education.

Capacity and Effort

Virtually every locality in the state spends beyond what the state requires it to match (referred to as Required Local Effort) because the state vastly underestimates what it actually costs to run schools. In aggregate, divisions spent 107% above the Required Local Effort, but Floyd County only spent 81%, which is 26 percentage points below the state average. Floyd would need to spend \$1,237,945 more annually to be at the average state percent above the Required Local Effort (this reflects the low level of effort the division puts into per pupil spending relative to the state).

Floyd County has capacity to do more to raise adequate revenue for its schools. The locality has a typical revenue capacity score according to the Virginia Auditor of Public Accounts, but does far less than most and has a lower level of fiscal stress than most localities. Floyd County's property tax effort is 22% below the average regional rate.

A one penny property tax increase in Floyd County would raise approximately \$180,000 annually.

Staffing

Floyd had an average budgeted teacher salary of \$55,076 in the 2023-2024 school year, which is \$15,365 below the state average. With high salaries and lower cost of living in nearby communities, on top of a dwindling supply of graduates with teaching degrees, Floyd is not in a strong position to compete for high-quality educators in the future.
