

York County Public Schools Budget Factors

The Schools Our Children Deserve

We all want our children to attend schools that are well-resourced and able to provide reliable transportation, nutritious meals, quality instruction, and essential health services. Since the pandemic, our roughly 13,000 students in York face more challenges than ever, from staff shortages, drops in academic achievement, and additional mental health needs. When looking at our current local spending, it's clear our budget comes up short in meeting the most pressing challenges our students and schools face today. York can step up to fund our schools at levels that meet our students' needs and better reflect our capacity and commitment to our children.

Budget

In the 2022-2023 school year, York County spent \$12,628 per student, ranking us 117 out of 131 school divisions in the state. Yet, when adjusted for the high cost of living, the spending power drops to \$11,774 per student and York County ranks 123 out of Virginia's 131 school divisions.

York has seen an increase in local per student spending of \$149 or 3% between the 2014-2015 and 2022-2023 school years (adjusted for inflation). Compared to the regional average for local per student spending, York only spent \$161 more in the 2022-2023 school year. While York had a strengthening economy over this time, its level of commitment and effort towards schools did not reflect this.

Capacity and Effort

Virtually every locality in the state spends beyond what the state requires it to match (referred to as Required Local Effort) because the state vastly underestimates what it actually costs to run schools. In aggregate, divisions spent 107% above the Required Local Effort, but York County only spent 98%, which is 9 percentage points below the state average. York would need to spend \$3,352,396 more annually to be at the average state percent above the Required Local Effort (this reflects the low level of effort the division puts into per pupil spending relative to the state).

York County has capacity to do more to raise adequate revenue for its schools. The locality has a relatively high revenue capacity according to the Virginia Auditor of Public Accounts and a low level of fiscal stress. York County's property tax effort is 20% below the average regional rate.

A one penny property tax increase in York County would raise approximately \$1,050,000 annually.

Outcomes

Many students lost significant ground on state academic achievement between the 2018-2019 and 2022-2023 school years. Students in York saw a drop in pass rates on the reading SOL test of 1.1% and 16.3% in math. Yet these total numbers mask worrisome disparities, with math SOL pass rates dropping 27.3% for English Learners and 25.9% for economically disadvantaged students. York must do more for its students who face significant barriers to education.

Staffing

The overall staffing vacancy rate was 4.0% as of October 2023, adding pressure for all staff to cover shortage areas.

York had an average budgeted teacher salary of \$57,929 in the 2023-2024 school year, which is \$12,512 below the state average. Adjusted for the relatively high cost of living in the locality, the average teacher salary drops to \$54,013. With high salaries and lower cost of living in nearby communities, on top of a dwindling supply of graduates with teaching degrees, York is not in a strong position to compete for high-quality educators in the future.
